## MEMORANDA.

**Trade.**—The oversea imports during November were valued at £2,517,124, which shows an increase of £434,047, or over 20 per cent., as compared with the corresponding month of last year. The total for the eleven months was £25,026,025, an increase of £3,869,747, or 18 per cent. over the corresponding figures for 1910. There were increases in most of the principal articles—apparel and soft goods, cordage and twines, metal manufactures, machines and machinery, and timber.

The oversea exports for November amounted to £3,733,289, being a decrease of £143,476, or over 3 per cent., as compared with the corresponding month of last year. For the eleven months there was a decrease in the oversea exports of £836,084, or nearly 3 per cent., as compared with last year.

Principal increases during the eleven months were— £

Butter...	...	...	...	...	357,133
Minerals	...	...	...	...	252,609

Principal decreases during the same period were— £

Wool	...	...	...	...	2,165,480
Other Pastoral Produce	...	...	...	...	399,249
Wheat and Flour	...	...	...	...	247,882

Separating merchandise from gold, the exports of the former during the eleven months decreased by £2,469,201, and the latter increased by £1,633,117.

**Imports at Sydney.**—Excluding the value of the imports from State ports, the articles imported at the port of Sydney in November were valued at £2,989,193. The following is a summary of the imports during the month :—

	Weight and Measurement.		Value.
	tons.	£	
Imports Oversea	128,285	2,439,163	
„ Interstate	25,037	550,030	
„ From State Ports	142,245	Not available.	
Transshipments—			
Oversea...	17,128	„	
Interstate	14,063	„	
To State Ports	10,451	„	

A few special articles, denoted by number in the detailed table within, have been converted into weight or measurement, and are included in the above statement. During the eleven months ended November, 1911, the oversea imports were valued at £24,174,233, and the Interstate imports at £7,554,972, the total of the two being £31,729,205.

**Public Finances.**—The Public Accounts for November show that the net revenue for the month was £1,333,772, or £54,956 more than in November of last year. During the five months ended 30th November, the revenue was £5,987,578, being £206,017 more than the corresponding period of the last financial year.

Principal increases during the five months were— £

From Taxation	...	...	...	122,661
„ Railways and Tramways	...	...	...	208,681
„ Sydney Harbour Trust	...	...	...	12,302
„ Water and Sewerage Rates	...	...	...	17,202

Principal decreases during the same period were— £

Commonwealth Returns	...	...	...	161,590
Lands	...	...	...	36,753

The expenditure during November was £780,446, a decrease of £47,605 as compared with November of last year. During the five months the expenditure was £6,239,024, being £262,452, or over 4 per cent. more than in 1910–11.

Principal increases during the five months were— £

Business Undertakings	...	...	...	134,125
Government Departments	...	...	...	65,189
Interest Repayments	...	...	...	63,138

On the 30th November, 1911, the Consolidated Revenue Account was in debit to the amount of £330,607, but which sum includes payments in anticipation of the passing of Loan Votes.

**Gold Production.**—The gold yield during November was 11,705 oz. crude, equal to 9,617 oz. fine, valued at £40,851. The value of gold produced during the eleven months was £689,220, and showed a decrease of £69,671, as compared with the corresponding period of 1910.

**Prices.**—The general index number for November was lower than that of October, but slightly higher than for the corresponding month of last year. The index number for pastoral produce was 1,201, for metals 1,230, and for all articles 1,219. During the month, the prices of wheat, copper, silver, and tin advanced; but butter (about 10 per cent.), greasy and scoured wool, frozen mutton, hides and sheepskins declined in value; other articles remained at about the same level as those ruling in October.

**Land Selections.**—During November 88 applications were made for 35,082 acres; and 18,667 acres, representing 25 blocks, were set apart for residential settlement. Since the beginning of the year, the number of applications has been 1,195, and the area applied for 706,691 acres. The original area set apart for residential settlement since the 1st January has been 511,602 acres, representing 698 blocks.

**Meteorology.**—During November, two storms affected New South Wales, one towards the end of the month being most prolific and of monsoonal character, which resulted in bounteous rains almost throughout the whole State. The Slopes, Northern Tableland, portions of the Hunter and Manning and Riverina districts were most favoured, but the falls received over nearly the total area were above the average, the exceptions being curiously on the extreme boundaries, viz., the Coast (to the East), the Murray River (to the south), and the Macintyre River (to the north-east).

**Vital Statistics—Sydney and Suburbs—November, 1911.**—The Births registered numbered 1,518, equal to 28·83 per 1,000 of population; of the total, 823 were males and 695 females. The rate is very satisfactory, being the highest for the month of November since the year 1895, and 8 per cent. above the average for the previous five years.

The total Deaths numbered 557, namely, 302 males and 255 females, equal to a rate of 10·58 per 1,000 of population, being below the average for the previous five years.

The Infantile mortality was 74 per 1,000 births, being 25 per cent. below the average for the previous five years.

**Wheat, 1911-12—Estimated Production.**—See Table No. 58 within.

The probable results of the wheat harvest for the present season in the various divisions of the State may be seen from the above table. The particulars are based mainly on information supplied by farmers. The reports indicate that the area sown with wheat was 2,799,272 acres, of which 470,737 acres have been cut for hay, and 2,267,845 acres will be harvested for grain (as compared with 2,128,826 acres in 1910-11). The estimated average yield is 10·3 bushels per acre, as compared with 13·1 bushels last season, and 10·7 bushels, the average of the preceding ten years.

The area this season which has been fed-off, or which failed entirely, was 60,690 acres, of which over 45,000 acres are in the North-Western Slope, Central-Western Plains, and the Riverina, where the influence of the dry season during the period of growth was felt most keenly.

As in the previous year, one of the features of the harvest is the patchiness of the crops, even in the Central and South-Western Slopes and Riverina divisions, where considerably more than half the wheat is grown. There are many excellent crops on fallowed land, but there are also very large numbers of poor crops, and their patchy nature in various districts has made it difficult to determine accurately the production of grain.

No season has ever furnished such an object lesson as to the benefits to be derived from a proper system of fallowing and intelligent working of the land. It would be profitable not only for the State but the farmers themselves if they would realise fully that no work on the land at any time is wasted, and that the labour is well repaid in the result. From almost every district reports have been received showing that notwithstanding the dry conditions prevailing during practically the whole period of growth,

many of the crops on fallowed and properly cultivated land are yielding up to 30 bushels per acre, and some are averaging even as high as 36 bushels. Unfortunately the large proportion of poor crops on stubble land have reduced the general average considerably, and the knowledge of this fact should stimulate farmers to adopt more scientific methods of cultivation when it has been so conclusively proved by practical experience that fallowed and properly worked land will give better results than an area of stubble twice or three times the size.

There is no doubt that in the drier districts of the State to be a successful wheat-grower it is essential that the farmer should adopt a proper system of fallowing, combined with other modern methods of cultivation for the conservation of moisture in the soil.

As in the previous year, the present season experienced an abundant rainfall in January and February. Light to heavy falls were recorded during March, but they were generally below the average, and April proved the driest month of the year. During the next five months the rainfall generally was light, although over the Wheat Belt beneficial rains were experienced during the months of May and July. During October scattered districts on the Tablelands and North-Western Slopes received sufficient moisture for the crops, but it was otherwise very dry, and similar conditions continued until late in November, when very heavy general rains set in.
